

The MooreFile™

Are you in the driver's seat?

You do business with manufacturers, wholesalers, buying and marketing groups everyday. Unfortunately, it seems that you're not all on the same page. Because of the lack of product code and data format standards, valuable time is wasted manually searching for product substitutes and loading item files from different sources into your computer. You're interested in driving sales forward, not spinning your wheels.

We hand you the keys.

The MooreFile™ and the MooreFile™ Plus from Trade Service provide a standardized database of office products needed to run a profitable business.

As the only database complete with MPCs (Moore Product Codes) wholesalers, buying groups, and marketing groups are adopting MooreFile as the industry standard. MooreFile eliminates the confusion and discrepancies created by multiple numbering schemes with MPCs for over 183,000 items from 1,200-plus manufacturers. It supports dealers in maintaining their profit margins with features that include buying group direct-buy pricing, updated wholesaler pricing, and promotional items. MooreFile Plus saves dealers even more time by providing accurate cross-references to the superstore item numbers needed to compete effectively.

The MooreFile™

Driving value to your business

As prices fluctuate, so do dealers' profit margins. Because of constantly changing prices, new products and promotional programs, dealers have to stay informed in order to increase sales. With the MooreFile and the MooreFile Plus, Trade Service gives dealers all the information they need to be profitable, and stay that way.

Distinctive Features

- View more than 183,000 items from over 1,200 manufacturers
- Locate items using cross-references to MPCs, wholesalers, manufacturers, or UPCs (and superstores, with the MooreFile Plus)
- Receive quarterly updates on wholesalers and promotional pricing, quantity breaks and buying group direct-buy pricing
- The MooreFile Plus includes cross-referencing to Corporate Express, Office Depot, Office Max, Quill and Staples

Key Benefits

- Save time and enhance communication within the industry by referring to an industry standard database
- Increase customer satisfaction by responding faster to special item requests
- Save time with quick and easy access to wholesaler pricing, product descriptions, commodity codes, units of measure, buying group net pricing, and manufacturer full product lines
- Eliminate stock discrepancies created by the confusion of multiple numbering schemes
