

**For Immediate Release**

August 11 2008

Quote Software has aligned its materials database with the **TRA-SER Premier** database from Trade Service, a leading provider of product and pricing services to Plumbing and Mechanical contractors. As a result, the QuoteExpress database can now be easily and effectively updated by Trade Service, maintaining pricing on an on-going basis.

TRA-SER is a user-friendly product data retrieval system of over 1.5 million Plumbing and Mechanical parts, including List and "Target" price columns, Internet pricing updates with an auto-scheduler, comprehensive product descriptions, color product images, and electronic links to manufacturer catalog pages.

**Complimentary copy of TRA-SER Premier**

With new QuoteExpress software, we include a complimentary 60-day evaluation copy of TRA-SER Premier to load into the QuoteExpress system and update the QuoteExpress database.

During the 60-day free trial period, the user receives complimentary TRA-SER updates via the Internet and also has access to the Trade Service pricing in the QuoteExpress database. Quote Software has written a special link that seamlessly brings the new pricing from TRA-SER into your QuoteExpress database each week. In addition, the user can "hot link" back into TRA-SER to electronically add new materials to the database at any time.

Trade Service can be contacted at **800-701-7003**, or visit [www.tradeservice.com](http://www.tradeservice.com).  
Quote Software, Inc. can be contacted at **800-813-7020**, or visit [www.quotesoft.com](http://www.quotesoft.com).
